

January 30, 2005

Dear Dr. Joe Hall and Staff of the Country Doctor Museum,

I have received a note from the Circle of Life that you have made a donation to the Circle of Life in Annabel's name. I want to give you my heartfelt thanks for your kindness. The care and attention that she received from all of the people who helped her through the last weeks of her life was wonderful and much appreciated by all of her family. The tender, loving care that they gave and expressed is truly appreciated by all of us...

As you may know, her health began failing in March when she fell on the ice and broke her right hip and her right shoulder. She always had pain in her hip and shoulder after that but no one would ever know for she never complained except when I would ask her a direct question.

We had over fifty years together, traveled to many wonderful places and have been blessed with friends and family.

I will miss her greatly but I am happy that she no longer has to suffer as she did during the last two months of her life.

Her Service was a Celebration of her life with a New Orleans' music. We spent our honeymoon in New Orleans and she often said: "When I die, I don't want to go to Heaven, I want to go to New Orleans."

Thanks again.

Love,

*B. James Andrews, M.D.*
